Mercy Corps partners with local organizations in the Caribbean to create Resilience Hubs that provide food, water, solar energy, and emergency tools during disaster moments. These hubs offer emergency kits, internet access, and disaster preparedness resources, with community members trained in first aid, water management, and solar energy to support effective responses and enhance long-term resilience.

Take the tour of one of our Resilience Hubs in Puerto Rico! You may have seen this, but we're particularly proud of this short video showcasing our disaster preparedness strategies. These hubs have become vital support points, offering resources and training for effective emergency preparedness. Take this 2-minute video tour with Infrastructure Program Officer, Alfredo Perez.

Hurricane Fiona Emergency Response in Puerto Rico: Now that you've taken the tour of our Resilience Hubs, see how they worked in action during and after Hurricane Fiona. Our Resilience Hubs were vital in the aftermath, distributing essential supplies, providing clean water, and maintaining power with solar energy. Learn more about our response in this brief 5-minute article.

Expanding Our Reach: Our locally led initiatives continue to grow throughout the Caribbean, empowering communities to strengthen their resilience. Explore our map to see where we're making a difference and how our work is helping communities build lasting resilience across the region.

Team Member Spotlight: Hear directly from Paula Watson-Popo, our Infrastructure Program Manager based in Saint Lucia in this 5-minute interview. Her insights into the challenges and opportunities in the region are inspiring!
